

Getting Started Guide

www.future-1.com

Welcome and Thank you for purchasing VinylMaster Pro.

In order for VinylMaster Pro, FutureRIP and Font Detective to work on your computer you must follow the instructions below.

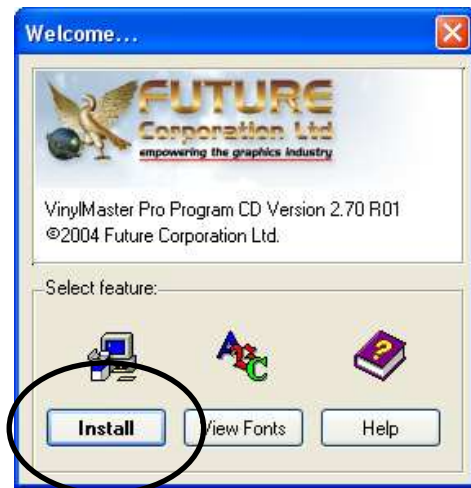

Hardware Lock (Dongle) Installation Instructions:

If you wish to use **FutureRIP** follow these instructions first:

1. Turn off computer.
2. Insert Dongle into LPT1 (Printer Port)
3. Start computer
4. Insert FutureRIP Program CD, follow prompts & install FutureRIP
5. Insert VinylMaster Pro Program CD, follow prompts & install VinylMaster Pro
6. If FutureRIP has been installed, click on the "Upgrade FutureRIP button" to update FutureRIP to the Dongle version.

If you do not wish to use **FutureRIP** follow these instructions first:

1. Turn off computer.
2. Insert Dongle into LPT1 (Printer Port)
3. Start computer

To get
PRIORITY TECH SUPPORT
Please register your Dongle with Future Corp at:

www.future-1.com/register_dongle.htm

4. Insert VinylMaster Pro Program CD & click on Install

5. click on VinylMaster Pro and follow the prompts through...

WARNING!! DO NOT PLUG OR UNPLUG THE DONGLE AT ANY TIME WHILE THE COMPUTER IS SWITCHED ON.

If your **Dongle becomes damaged** contact Future Corporation for a temporary Product # so that you can use the on-line registration version. Note: In this event you will need to install VMP again from the CD.

Registration: All 'Non-Dongle' Future Corporation software must be registered before it will become fully functional (unlocked). This is done using a Product # (formerly Customer #). The registration procedure also requires a number that is generated from your computer after installing the software. This number is a unique 'Computer ID #' that when combined with your Product # produces a unique Registration #. This Registration # is then typed into a window on your computer which registers (unlocks) the software.

To register any one of Future Corporation's software products:

1. Obtain a temporary 'Product #' from Future Corporation.
2. Decide which computer to register the software on, and obtain that PC's 'Computer ID #'.
3. To obtain a 'Registration #' go to the registration area at www.future-1.com and click on Register, type in your numbers as indicated and obtain a Registration #.

Once a Registration Number has been obtained, the software can be registered (unlocked). To do this, click on the Help Menu of the software and then click on 'Registration'. In the registration window that comes up you will be presented with your program status, along with your Computer ID # and Transfer Code (where applicable). To register click on the Register button and type in the Registration # and then on OK.

NOTE: there are very specific registration rules when using Future Corporation Ltd Software, and you are strongly recommended to read through the End User License Agreement (EULA) for more information.
